

REMOTE SENSOR SERIES

Description

- Operation mode and max sensing range:
Thru-beam: Dependent on amplifier (up to 70m)
Diffuse proximity: Dependent on amplifier (up to 5m)
- Optional sensor monitor LED
- Wide variety of housings
- High tolerance to hostile environments
- Cable or plug connections
- Available with optional  ATEX approval

The remote sensor series, which consists of a transmitter LT and receiver LR, is made to operate in conjunction with a Telco photoelectric amplifier from the PA, MPA or PAB programmes.

The series is available with optional power-(LR) and output-(LT) monitor LEDs for use with any Telco photoelectric amplifier which has the sensor LED drive feature incorporated.

The remote sensors are available in a wide range of housings, with either cable or plug connection, and may be used in thru-beam or diffuse proximity mode.

Note: 1. Photo amplifiers to be ordered separately.

2. Remote sensors are available with optional power (LR) and output (LT) monitor LEDs for use with the applicable Telco photoelectric amplifier, which has the sensor LED drive. Add 'L' after the series number for sensor monitor LED e.g. LT/LR 101L AP 25 5. Sensors marked ² are not available with this optional feature.

3. Remote Sensor series with cable connection is available to comply with ATEX  II 3 GD T6 EEx nA II U. Add "/EX" after the series number e.g. LT/LR 100/EX TS38 5. Sensors marked ³ are not available to comply with ATEX approval.
